EXPERIENCE

Nova Horizons

FRONT-END DEVELOPMENT

I work as a front end developer using various technologies (Vanilla JS, JQuery, PHP) to implement design patterns. Implement front-end design and logic to multiple platforms(Web, Mobile) with great industry knowledge and incredible attention to detail. Independently working to implement features remotely.

GIGWERK– gigwerk.io

FRONT-END DEVELOPMENT

I currently work as a front end developer at gigwerk.io. The company is based out of Rochester, MN and I have been tasked to implement front-end design and logic to multiple platforms(Web, Mobile). The tech we use to build the front end is Angular and TailwindCSS as well as VueJS and NuxtJS. We are hoping to launch at the beginning of 2021.

ASKFAVR – askfavr.com

FRONT-END DEVELOPMENT

AskFavr is a startup company from Rochester MN that connects freelance workers with people in their community. Favr provides services like home chores, lawn maintenance, moving, etc. Workers are usually full-time students that would like to make money on the side. I help build their new fundraising feature with Angular 8.

PROJECTS

ONSNIP2 – onsnip2.firebaseapp.com

FULL-STACK DEVELOPMENT

OnSnip2 is a 3rd party Spotify dashboard web application that displays user's information about their favorite artist, playlist, and tracks in a dark-themed responsive UI.
Built with:
- Angular 8
- Firestore
- Node/js
- Express
- Firebase Cloud Functions

DISCOVERMN- discover-mn.firebaseapp.com

FULL- STACK DEVELOPMENT

Discover MN is a full-stack application that offers visitors information about Minnesotan culture and exposure to some attractions that Minnesota is known for. Users can also see events happening near them.

Built with:

- Angular 7
- Express
- Heroku
- Firebase Cloud Functions

RESPONSIVE WEB TEMPLATES

FRONT-END DEVELOPMENT

Here are some beautiful responsive web templates that could be used for anything from administration, showcase, and dashboards.

Templates:

- Bloggen - https://blogenmm.herokuapp.com/
- Glozzom - https://glozzommm.herokuapp.com/
- LoopLab = https://looplabmm.herokuapp.com/
- Mizuxes = https://mizuxesmm.herokuapp.com/
